

IN THE SPECIFICATION:

On page 10, first full paragraph,

FIG. 17a,b : Frozen sections of normal human skin stained with anti-ACA-antibody.

On page 10, second full paragraph,

FIG. 18a,b: Normal human cultured epidermal melanocytes stained with anti-ACA-antibody.

On page 10, third full paragraph,

FIG. 19c: Normal human cultured epidermal melanocytes ~~keratinocytes~~ (a) and keratinocytes cell line HaCaT (~~b~~) stained with anti-ACA-antibody.

On page 10, sixth full paragraph,

FIG. 21a,b: Frozen sections of human melanoma stained with anti-ACA-antibody

On page 10, last paragraph,

FIG. 22a,b: Melanoma skin metastasis stained with anti-ACA-antibody

On page 11, first full paragraph,

FIG. 23a,b: Frozen sections of human a) basalioma, b) spinalioma stained with anti-ACA-antibody

On page 11, fifth full paragraph,

(a) HEL, (~~b~~) ~~U-937~~, (~~c~~) (b) HL-60, (~~d~~) (c) K-562

On page 12, fourth full paragraph,

(e,f): Immoblott analysis of soluble form of ACA in supernatants of granulocytes derived from healthy donor (~~d~~) (e) and PNH patient (~~e~~) (f) after the action of phospholipase C.
